

Rock & Roll with class!

Yamaha CLP175 - PE Digital Piano

Width : 1435mm
 Depth : 1147mm
 Height : 933mm
 Weight : 118Kg

Exquisite craftsmanship and leading technology combined

The new Clavinova CLP 175 - Top Model elegantly harmonizes grand piano aesthetics with the power and advanced functionality of Yamaha digital piano technology. Featuring our "natural Keyboard" and iAFC (Instrumental Active Field Control), the CLP-175 combines outstanding response and breathtakingly realistic sound in a beautiful grand piano style wood cabinet.

The CLP-175 features a YSB interface, allowing convenient connection to virtually any current home computer. The power of a PC and the Internet provide vastly expanded musical capabilities. The CLP-175 comes complete with a CD-Rom which includes the USB driver, File Utility, and Scorch Sample songs. The File Utility allows simple "drag and drop" management of songs between the CLP-175 and the computer while Scorch I a brilliant innovation in music interactivity. A single Scorch file contains a music score and its associated MIDI song data. The score may be displayed on your computer monitor or even printed out, while the song is played through the CLP-175. The score is also interactive - the MIDI song data is updated with any adjustment you make (such as note and dynamics changes).
